

chill-out high gordon guillaumier

Chill-Out is a modular system of elements which can stay independent, like armchairs and sofas, or can create a lot of different angular or linear compositions. A project enhanced by a new dimension thanks to the high backrest version, embellished by a grill of stitches which contributes to create a more intimate seat and to organize space like a dividing screen. Chill-Out High has been designed to easily allow combinations with low backrest Chill-Out elements increasing the possibilities of composing and personalizing the space.
