

Due Più

Year	1971 - 2023
Designer	Nanda Vigo

Nanda Vigo's armchair known as *Due Più* is an astonishing, enigmatic object where the use of two rollers that look like they're floating makes for truly unique features. Futurist in aspect, we can see it as an emblematic design blending Vigo's two souls: the *esprit de géométrie* that shines through the minimalist metallic structure with its light reflection, and an eccentric, pioneering spirit apparent in the use of Mongolian fur. Currently presented by Acerbis with a steel frame and furs reclaimed from food industry waste, according to circular economy principles that make it compatible with contemporary ethics.

Dimensions

Finishes

The seat and back are padded with single-density polyurethane foam in a Ø19 cm cylindrical shape upholstered in Mongolia goat fur in white, black and rust. This upholstery gives the rollers a voluminous elegant effect. Sled frame in Ø3 cm tubular metal with chrome finish.

Coating | pelliccia di Mongolia

Structure | Chrome
