

Glide monica forster

Monica Forster's design is both inspired by nature and the research for new materials and technologies. Glide, The new Tacchini chair recalls the fluid transformation of the elements and the coexistence of different states through the use of soft and enveloping forms. The compact polyurethane shell is modeled with a sinuous and ergonomic profile.

materials:

Base in metal lacquered white, black, grey or blue, rigid and flexible polyurethane structure, upholstery in fabric or leather.

dimensions:

T. 41.7"

W. 25.6"

H. 24.0"

H. seat 14.6"
