

holo collection kensaku oshiro

The combination of Kristalia's technology with Kensaku Oshiro's creativity has led to Holo: a table featuring an original base and an oval hole, with a softly moulded shape in sheet metal, made using a process that involves many moulding and bending phases. This original base supports a Fenix-NTM® top with a matt anti-reflective effect that gives the surface of this material warm appeal and a soft touch.

base materials:

White lacquered steel (similar to RAL 9016)
 "Fenix-NTM® London grey" lacquered steel
 Black lacquered steel (similar to RAL 9004)
 Brass

top materials:

Kos white 0032 Fenix-NTM®
