

# Kipu Anderssen & Voll

Born from their fascination with the smooth pebbles of rivers, inspired by natural elements, the modular seating Kipu is a further step in the evolution of the lounge area at Lapalma. The shape of the Kipu comes from the constraints of the triangle, softened by the choice of colors and fabrics, intersected by visible stitches, which underline its contemporary and informal spirit. Flexibility in combining them and extreme functionality, make Kipu a crossover product, suitable for working places, informal meeting areas, waiting zones, libraries but also residential projects, where comfortable islands can be joined.
