

## lab karri monni

Like a stool, yet with an anatomic and flexible back support, LAB is an office seating system with a totally different look in line with the times of contemporary work. Not the usual office chair, bulky and static, LAB give a touch of class and color to the working place. LAB is available with a swivel seat, adjustable height option, on fixed feet or on castors with an auto locking system. The upholstered seat has an adjustable back support.
