

lp lucidipevere

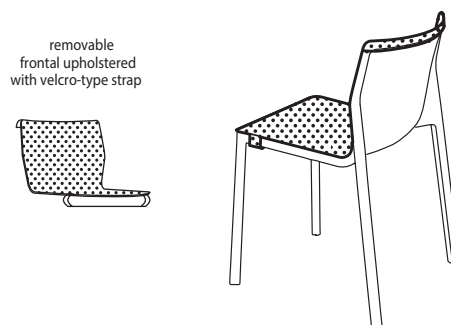

Indoor/outdoor use

The designer duo LucidiPevere has created a new chair for Kristalia. Made of fibre glass-reinforced injection-moulded polypropylene, LP is stackable and available in a variety of colours. Its surface also feels soft to the touch and is matt, making it particularly elegant, with warm and striking appeal. Its special features make LP ideal for all contexts: in the home, outdoors or in contract furniture projects..
