LA GRANDE TABLE

Designed by Xavier Lust

INDOOR AND OUTDOOR TABLE

A table made from a single curved and painted aluminum sheet, joint-free shape: La Grande Table surprises thanks to its slender proportions and lightness.

The design of the table and the peculiarity of the bending in the aluminium sheet produce structural curves in the tabletop, both in length and transversally, that define its identity.

A table protagonist of the space that bears the signature of the Belgian designer Xavier Lust, whose creative approach is aimed at overcoming the limits of the material by evolving production systems that result in objects with innovative volumes.

La Grande Table offers different size options: thanks to the reinforcement beams incorporated in the internal structure, it reaches 4.4m in length, maintaining a thickness of only 6 mm.

Available in lacquered aluminium, matt or glossy white lacquered, La Grande Table fits into indoor and outdoor contexts such as gardens, terraces and dehors.

Linear style and timeless design allow La Grande Table to adapt to different styles of furniture and to integrate with the surrounding environment.
