#### MATERIALS

Sandblasted stainless steel and powder-coated galvanized steel. Denatured alcohol.  
Burner capacity: 1 litre. Consumption: 0,4-0,5 litres/hour. Autonomy: 2-2'5 hours. Power: 3 kW.  
Available in all colors of the collection.

#### TECHNICAL SPECIFICATIONS

Use in outdoor, draughty spaces and place it on a flat, non-slip, non-flammable surface. Pour the liquid in the burner and light it carefully with a match lighter. Do not fill it or manipulate the container with flammable liquid while burning. Keep away from children. A lid is provided for extinguishing the fire manually. After putting out the flame, let it cool down for a while before manipulating it. We recommend using bioethanol because it has a clean and clear flame and it does neither produce residues nor smoke when burning.
