

Marina Table Bruno Fattorini & Partners

The Marina picnic set is available without the attached seating benches to create a free-standing table. What makes this range unique is the fact that you can put together your own personal table arrangement. Marina table and Marina picnic are not only unlimited in length, you can also extend their long architectural lines from the terrace through to the dining room, from the office workspace through to the office canteen. Boundaries blur between work and play, indoors and outdoors. Individual spaces become shared spaces, and this range is specifically designed to make sure there is unity and simplicity in your private house or project.

The composite of glass fibre and polyester is a solid, durable and contemporary material that feels just like wood. However, it is considerably less sensitive to temperature changes and humidity. The good quality of the material means that the design is relatively lightweight.

Four tabletop widths are available: one consists of five fibreglass sections and one of six sections. When you double these tables in width, you get the perfect desk, creating a slot for cable management and desk dividers. There are also two tabletop heights available: one version for normal seating height, and another for bar stool seating height. The number of table legs increases in proportion to the length.

materials:

Fiber Glass

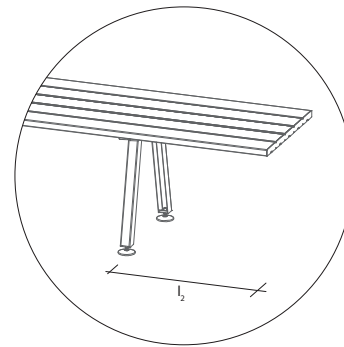

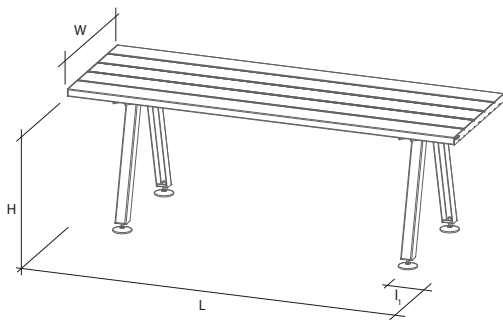

Powder Coated Steel

Polyamide
