

melt tom dixon

With MELT, our experiments in the technologically advanced field of vacuum metallisation takes on a new twist. MELT Copper is a distorted lighting globe born from our collaboration with Swedish radical design collective FRONT.

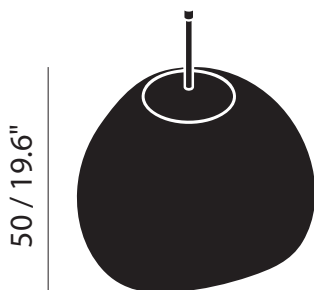

The light bouncing and reflecting around the uneven surfaces creates a dramatic melting hot blown glass effect. MELT is translucent when on and mirror-finish when off.

Available in chrome, copper and gold.

materials:

Vacuun Metalized Polycarbonate

dimensions:

orange skin
