METODO

Designed by Leonardo Talarico

METODO, A NEW CONCEPT OF COFFEE-TABLE

A pure and rigorous design, featuring clear and precise, yet highly original lines: the brand new Metodo coffee table immediately catches the eye.

It was designed for MDF Italia by Leonardo Talarico, talented designer renowned for his strict excess reduction and his search for essentiality in objects and furnishings design. Conceived according to a rigorous stylistic pattern, Metodo develops its shape in the space by means of circles that, placed on different levels, meet to create both the top and the entire structure.

The result is a simple product, but unforgettable, essential, but with a strong personality. Metodo, perfectly fits into many residential spaces: from the living area next to the sofas, up to the night area, as an ultra-contemporary bedside table. With its silhouette, that from the first look is unmistakable, Metodo is an emotion, well defined in a living space.
