

misses flower power

philippe starck

Misses Flower Power is a decidedly "oversized vase". The quest for a visually striking chromatic effects led to the development of a production technique that brings life to a semi-transparent and irregular surface to produce a vintage glass look. The technology used- rotational molding- first applied to transparent polycarbonate, produces a single hollow piece, which is suitable for containing soil, water, plants or flowers. The round base, the same color as the structure, gives the vase excellent stability. This extra-large vase is also available in a polyethylene opaque-color version.

materials:

Transparent Polycarbonate and Polyethylene

dimensions:

22.44" Ø x 64.57" h
