

PALCO SOFA

Info

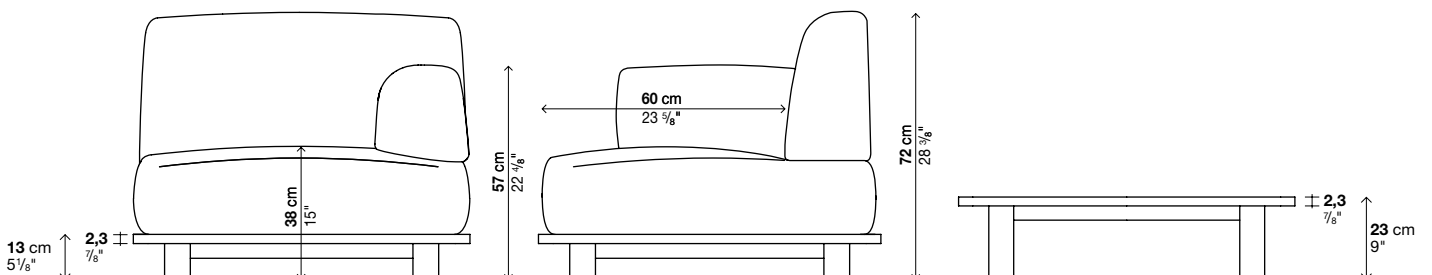

Palco is made up of a platform in teak or aluminum slats with a metal base and one or more padded elements, to be combined with each other to create different configurations, which can also be modified after purchase. The platform can be completely covered with padded elements or used as a low table, on which to place a lamp, a book or a cocktail.

The ideal location suggested by Kristalia for Palco is in covered and semi-covered verandas and terraces.

To improve the longevity of products made of teak, Kristalia recommends covering them with the special Casper covers.
