

## ZA shin & tomoko Azumi

A seating system of modular elements in curved and linear forms that can be repeated infinitely with a "millipede" effect. This modular system offers one and two-seat benches and a curved element. With a cast aluminum or powder coated frame in white or black, ZA is stackable and comes in several wood finishes or upholstered in leather. These units can easily be linked to create flowing lines and circular elements for waiting areas, museums and schools.
