

toobe ferruccio laviani

Toobe is the first floor lamp for Kartell, a master key that completes the lamp family. Toobe was conceived from the idea that the use of PMMA extruded tube could, according to length, be either a floor or a table lamp. Due to innovative coloring technology, Toobe is the first Kartell product to be "faded" to permit a special light to be diffused within the cylinder. The line is simple and modern. The handle in the body makes the lamp functional and easy to move.

Table Lamp: 8" diameter/ 21 3/4" height

Floor Lamp: 8" diameter/ 67 1/2" height
