

broom philippe starck

Philippe Starck and Emeco came together to create a new chair that is reclaimed, repurposed, recyclable – and designed to last. The chair is made from 75% waste polypropylene and 15% reclaimed wood fiber that would normally be swept into the trash, “Imagine”, says Philippe Starck, “a guy who takes a humble broom and starts to clean the workshop and with this dust he makes new magic”. That’s why we call it Broom chair.

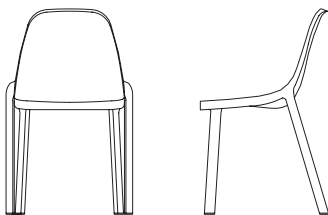

Materials

90% reclaimed wood polypropylene in:

Dimensions
