

honeycomb alberto meda

A folding chair with simple lines and an extremely elegant design. The product's functional features are fully consistent with its aesthetic qualities. Its seat and backrest have a structured texture arranged in hexagonal modules, combining striking good looks with practicality and ergonomics. Honeycomb is a folding chair with an anodized aluminum steel frame and a transparent plastic backrest and seat. The honeycomb structure of the seat and backrest ensures the sturdiness and lightness required of a folding chair, while its three-dimensional pattern magically reflects the light. Honeycomb is easy to close, lightweight and elegant.

Materials

Seat and backrest transparent or colored polycarbonate, frame in matte anodised aluminium.

Color options:

Transparent		Opaque	
			
B4/crystal	J1/smoke grey	J5/light blue	E5/glossy white
