

jensen rodolfo dordoni

This is Jensen, designed to set the standard - one hundred percent armchair. Rigid, the external structure lends stability to the shape while the goose down cushioning invites surrender. A canete highlights the design along with a zipper that serves both decorative and practical purposes. But it's the base that expresses the impeccable originality and uniqueness of Jensen. An interplay of the most sophisticated technology made possible through research, design and engineering. At the service of evocative beauty.

materials:

Metal with elastic straps with a high rubber content, let into fireproof polyurethane foam with softer polyurethane foam insert. Cushions in goose down seat with a high-density polyurethane foam insert in different densities. Cover completely removable fabric or leather. Base in molded die-cast aluminum pewter colored with extra glossy, anti-touch finish. The base of the armchair can be swiveled, rotating 60 degrees each side, or fixed.
