

# hi-glob philippe starck

Hi-Glob arose from the idea of combining different materials to obtain a greater structural rigidity, solidity while using an innovative design approach. The texture, opacity and thickness of the seat make Hi-Glob a true masterpiece of style. The seat is made with a special plastic compound that gives the chairs a warm and mellow, soft and opaque quality. The material used is batch-dyed to guarantee goo resistance to abrasions, optimum product life and outdoor usage. The Hi-Glob is stackable.

## materials:

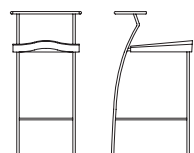

Seat: smooth batch-dyed polypropylene

Frame: epoxy-polyester powder coated

width	height	depth	seat height
