

# mak stool patrick norguet

Lapalma has been able to offer with MAK a new design with soft lines but robust in structure at the same time, a handy stool with compact size. With its ribbon in the back and as foot-rest, it can be matched with the STIL chair by the same designer and manufactured by lapalma. MAK, owing to the combination of colours between its metal frame and the upholstered fabric seat together with the option of height adjustment, is suitable for reduced spaces of contemporary public spaces and HoReCa, but can also offer the perfect touch to a residential project. This stool is available with swivel seat, fix or adjustable height.

## materials:

It is made with black or white powder coated metal frame and seat in fabric or soft leather.
