

powell bed rodolfo dordoni

The aesthetic and design merits of the Powell sofa come together in the bed of the same name. The imposing size of the bed is contrasted by the aluminum frame of the base, lending lightness and giving it the appearance of being suspended in air. The headboard is generously cushioned and comes in two heights, 94cm and 121cm. The sophisticated simplicity of the Powell bed is a sign of its natural inclination to inhabit any setting with elegance and discretion.

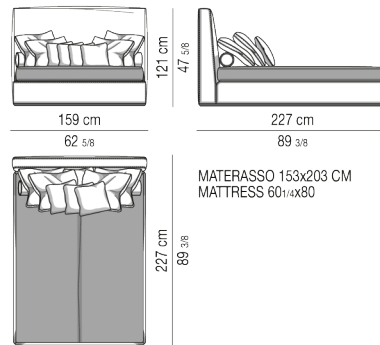

materials

Upholstered wood frame with high density foam. Base in extruded aluminum glossy lacquer celadon, granite, prune, sand or pewter.
