

vad luca nichetto

Four-legs stackable or swivel chair.
The Vad pays tribute to the tradition of the Scandinavian masters. The body of the chair, durable and striking, is produced in recyclable reinforced polypropylene by means of injection moulding in a single block and using certified Polygiene technology, rendering the product antibacterial. The Vad is suitable for indoor as well as outdoor spaces, making it a fit for both contract and domestic environments.

materials:

Structure in painted, chromed, satin-chromed metal or steel. Seat in polypropylene and available with fabric seat cover.
