

## southbeach cristophe pillet

Both comfortable and protective, it is a strong and distinctive work, which commands the space which it inhabits: from the most prestigious domestic space to a commercial environment. A curved structure, which supports and envelops the seat and backrest, SouthBeach is made from solid strips of birch wood (available in a bleached, black or white lacquer) linked together with saith - finish nickel-plated steel rings. The seat and headrest are composed of multi-layered birch wood.
