

sushi 12 bartoli design

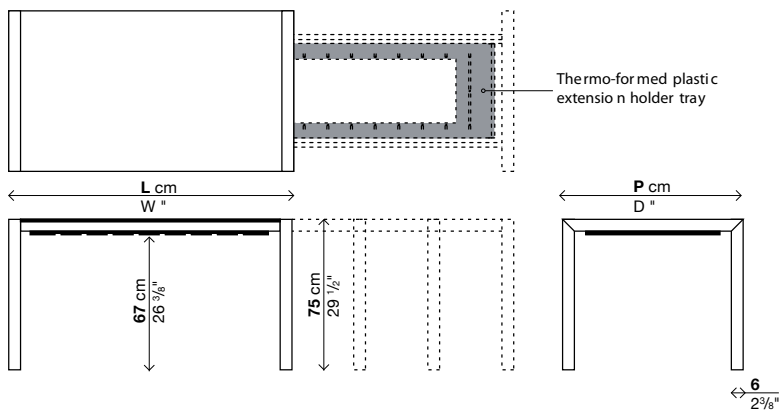

The minimalist charm of the extendible Sushi table can be seen in this outdoor version equipped with the same extension device as the indoor one, but with a 12mm thick HPL top to guarantee even higher resistance while keeping an extremely slender profile. The tray that houses the extensions is in tough thermoformed plastic, and is equipped with perforations for rainwater runoff. It has an aluminum frame with stainless steel fixings to ensure it remains unchanged over time.

materials:

Aluminum frame with stainless steel fixings. Top in HPL. The tray that houses the extensions is in tough thermoformed plastic and is equipped with perforations for rainwater runoff.
