

andersen bed rodolfo dordoni

Bed for the Andersen Collection by Minotti.

materials:

Frame: one-piece headboard, multi-ply wood footboard and frame, assembled by means of user-friendly metal corner joints. Frame preparation: headboard and frame padded with high resilience polyurethane foam of various densities. The frame is covered with fibre thermally bound to white canvas, which results in soft upholstery, while separating it from the fabric. The headboard is lined with a quilt padded with antiallergenic fibre divided into sections, which results in enhanced softness and comfort for the head, almost like a sofa cushion.

Base: with metal frame, rectangular section, 30x15 mm; Pewter-coloured finish.

Covers: fully removable in the fabric version.
