

## norman rodolfo dordoni

The new range of coffee tables, Norman, available in several sizes, can be flexibly used within the various sets. Available in two different versions: in tempered extraclear glass, which results in a rational, light image; with a walnut top, for a warmer, solid version. Both versions are enhanced by tubular black-nickel finished frames 20 mm in diameter. Because they are available in several sizes, they suit rooms varying in type, in the round as in the square versions.
