

victoria ghost philippe starck

This is a chair born of classic lines with a rounded backrest that recalls the shape of antique medallions, whilst the seat is linear and geometric. Victoria Ghost is made of transparent, coloured polycarbonate and formed in a single injection mould. It is stable, comfortable, robust and weather resistant. Once more we find a chair created thanks to the technological know-how amassed over the years by Kartell to create articles which have made the company world renowned. It is an article with great charm and personality which fits elegantly into any style of surrounding.

Materials

Transparent or batch-dyed polycarbonate.

Transparent
