

## flipt jeff miller

Convertible armchair/chaise-longue with steel structure, CFC-free foamed polyurethane seat and chromed steel or stainless steel base. An internal double hinge allows the seat to flip forward, opening up and thus doubling the length of the chair. Removable cover in fabric, synthetic material, leather, customer leather or customer fabric, also available in a two-color combination, with the possibility to combine different fabrics and leathers of similar thickness. Additional covers are available on request.
