

# modular bookshelf giulio polvara

Like a building block toy, this modular bookcase allows the user to create with limitless shapes and dimensions. The system is composed of three joints and four panels in plastic with modular dimensions of the same depth. Assembly involves simply pressing the elements to lock them together, without the help of tools or the use of screws. The special solidity of the structure allows the system to be used as a shelf supporting a dividing barrier or even as a shelf in the middle of the room. Ideal for the home and the office, the bookcase system is fitted with a cubic container, a component which is offered in various colors. The cube, a useful and colorful bookshelf accessory, can be employed as a stand alone container for storage of toys, clothes and other objects. Such simple features allow the formation of a practical bookshelf suited to any home or office space imaginable, a simple solution for storage.
