

doodle claesson koivisto rune

Doodle are the drawings we do while on the phone. Lines, spirals, and swirls that are always different, the inspiration behind the design concept of this seating range. Armchairs of various sizes and chairs with light and organic shapes, with soft upholstery covered in leather or fabric and decorated with visible stitching. Embroidery that creates random patterns along the profile of the seat and tangling towards the middle, the signature detail of this design. The metal base, fixed or pivoting, is available in a chrome or paint finish. The covers are always removable.
