

hopper combi dirk wynants

The Hopper Combi is a popular choice for both gardens and workplaces. The two access points allow you to sit down far more elegantly than if you had to swing your legs over the bench. From now on you can opt to replace one or both benches with chairs. Go for a few Captain's chairs to add huge amounts of comfort to your garden suite. Or should we say: your office suite?

Hopper Combi is available in four sizes, seating four, six, eight, or ten people. Choose galvanised steel legs for extreme durability, or powder-coated aluminium table legs for a more refined look.
