

rest harry & camila

A complete furniture collection developed by two outdoor design specialists, Harry&Camila. It includes a stackable chair, a stackable lounge chair with or without armrests, a stackable chaise lounge and a lounge on wheels. They have epoxy-lacquered aluminum frames suitable for the outdoors with upholstery being either polyester rope or interlaced straps, for a textile and technological effect. The frames and upholstery are available in beige, brown, anthracite grey and black to provide tone-on-tone shades or to experiment with many color combinations.

materials:

Aluminum frame and polyester rope.
