

be-easy bluezone

be-Easy is a collection of indoor extendable or fixed tables with minimalist appeal, featuring a Fenix-NTM® top available in various colours.

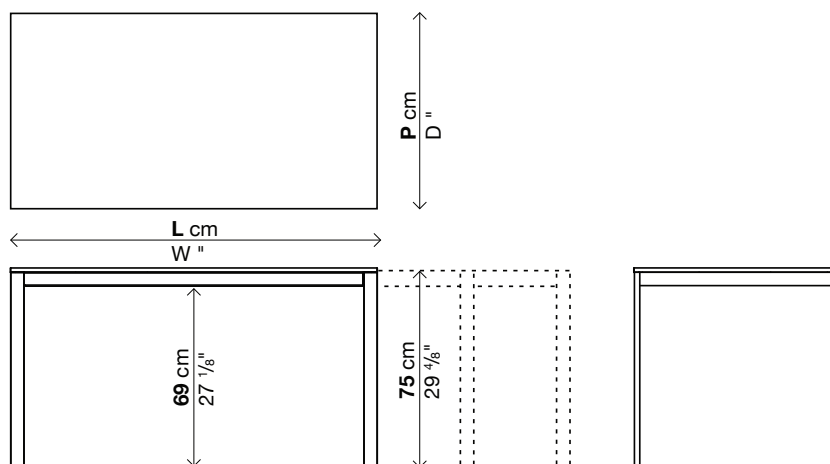

NTM stands for NanoTech Matt, or the anti-reflective matt effect that gives the surface of this material its warm aesthetic and soft tactile appeal, and its high resistance to scratching, abrasion, heat, stains, impact, detergents and solvents.

The table legs are powder-coated with a soft matt effect to create an attractive single-colour and single-material effect with the top

materials:

Top in Fenix-NTM® Kos white, Ottawa beaver, London grey or ingo black. Legs in same colors in powder coated steel.
