

blío neuland, paster and geldmacher

Blio is a modular bookcase inspired by the fascinating charm of bookshelves in libraries, to be explored aisle after aisle. This atmosphere is created in the home or office, with units with side access, instead of the front access of traditional bookcases. Hence, Blio appears to be a composition of minimalist and relaxing white surfaces. The units, comprising various elements, can stand alone or give shape to large compositions.

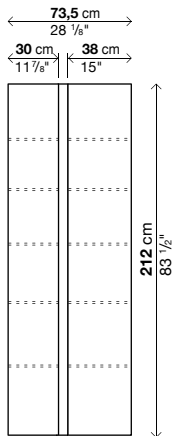

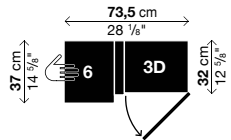

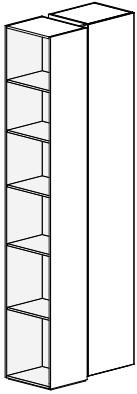

materials:
MDF in all white.

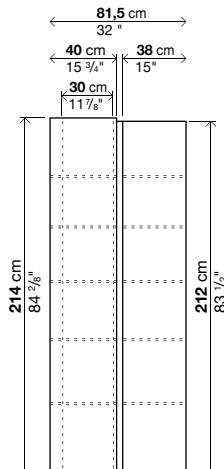

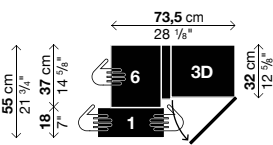

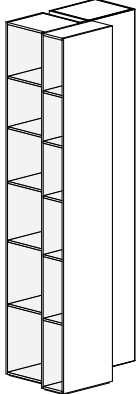

Doors with push-pull opening, 12mm thick.
Shelves are fixed (except for the shoe rack unit).
Non-standard elements cannot be made.
Units must be fastened to the wall.
