

easy bluezone

It is easy to furnish the home with Easy tables, and meet any organizational or functional requirement. The top is available in laminate or back-painted glass. The extendable version considerably lengthens the table, adding one or two extensions in a few simple movements. Its metal legs are available in different finishes in a rectangular (3x5 cm) cross-section. The table with laminatetop also comes in a different size 31.5" X 31.5" -designed for restricted interiors, with folding extension device.

materials:

Leg finish: Steel with aluminium lacquer, white lacquer, or black lacquer.

Top finish: White laminate with black edges or black laminate.

Easy/Easy+ laminate

Designed by Bluezone

Extending or fixed table with an anodised aluminium structure and aluminium painted or chrome-plated steel legs. The top is in 12 mm thick layered laminate. The extending system consists in two extensions that can be used one at a time. Just a few simple gestures remarkably increase the length of the table.

Finish of frame:

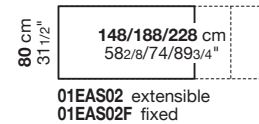

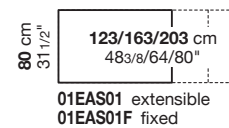

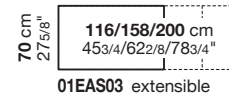

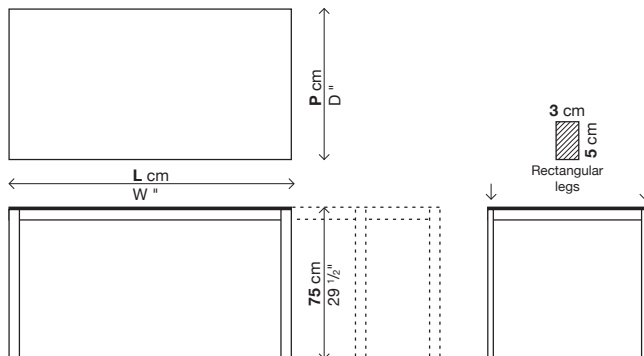

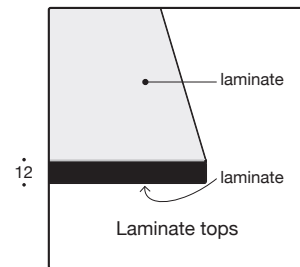

Anodised aluminium

Leg finish:

Aluminium painted steel, white or black lacquer

Finish of top/extensions:

White with black edges or black laminate

Easy 80x80 laminate

Designed by Bluezone

Kristalia has created an ad hoc technical solution for the Easy 80x80cm table, with folding opening that doubles its surface in size: an option specifically designed to make the best possible use of even the most restricted areas, providing plenty of flexibility. Instead of using a traditional hinge, which would not match the clear-cut and linear design of the table, a plastic strip has been used that is particularly thin, flexible and resistant, fastened to the edge of the top with aluminium profiles. The strip is also black, like the edge of the top, so that it perfectly matches the aesthetic appeal of the table

Finish of frame:

Anodised aluminium

Leg finish:

Aluminium painted steel, white or black lacquer

Finish of top:

White with black edges or black laminate
