

flow stool jean marie massaud

A family of stools of great impact and comfort completing the Flow Collection. Designed for home, office and community areas, they're available with a wide range of bases and finishes.

materials:

The shell is made from moulded polyurethane and is offered in matte white or black. The polyurethane used, called TECH®, is a high-density structural material that provides high resistance to impact, scratches and aging.

The Upholstered flow Pouf is made of a plywood frame covered with non-deformable polyurethane and polyester wadding. The upholstery covers the whole seat, and is fully removable.

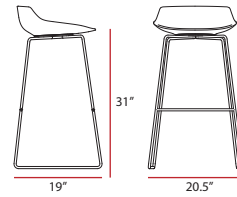

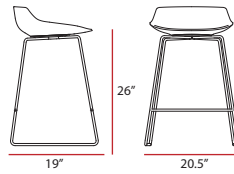

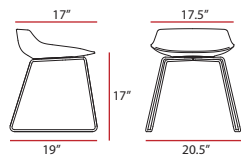

There are four base options:

- 4-legged oak base, in solid oak with a natural, brown or bleached finish. With a lacquered aluminium coupling device in matt white or graphite, and brushed stainless steel footrest on all versions.
- Sled base in steel wire, painted matte white, matte graphite, or chrome-plated.
- 4-legged steel base, in folded sheet metal, painted matte white or graphite, with an aluminium coupling device in the same colour
- LEM 4-legged base, in double-layer tubular steel with connecting elements in steel wire in matte white or matte graphite. Aluminium coupling device in the same colour.
