

sheLLf ka-lai chan

Created in the studio of a young artist as a limited edition sculpture, SheLLf has become a standard furnishing item, thanks to its encounter with Kristalia technology: a composition of rectangular compartments in different shapes, in MDF with lacquer finish, connected with invisible 45° joints. The visual effect is dynamic and well-structured: the designer was inspired by an animal coming out of its shell. Available in 3 different sizes.

materials:

MDF in all white, or white on the outside with compartments in light grey, black or turquoise green on the inside.
